

TRENDZO

HYPERLOCAL FASHION · TRY BEFORE YOU BUY

TRY IT BEFORE YOU BUY IT.

Hyperlocal fashion from the stores around you.
Try it on at your door, or on your screen,
before a rupee leaves your account.

60 MINUTE DELIVERY

Try first, pay later.

INDORE PILOT

Expanding soon.

INVESTOR BRIEF

Pre-launch phase.

WHAT CHANGED

India learned to expect things in minutes. That expectation is not going back.

INDIA'S QUICK-COMMERCE GMV, US\$

16–17%

OF INDIA'S E-RETAIL GMV — CHINA IS 5–7%

~8x

MORE VISITS END IN A PURCHASE THAN ON ORDINARY SHOPPING APPS

35–40M

MONTHLY SHOPPERS, OF 290–300M ONLINE

Fashion followed within a year — Myntra M-Now, Flipkart Minutes and Amazon Now all opened 30-minute fashion inside roughly twelve months of each other.

WHERE IT STOPPED

Quick commerce reached the kitchen, not the wardrobe.

SHARE OF EACH CATEGORY’S ONLINE GMV THAT RAN THROUGH QUICK COMMERCE · INDIA, 2025

of the fashion that is already sold online

AND HOW MUCH OF ALL FASHION IN INDIA IS BOUGHT ONLINE AT ALL

81%

BUY CLOTHES IN A SHOP TO TOUCH, FEEL AND TRY

24%

OF PAY-ON-DELIVERY ORDERS COME BACK — 10% PREPAID

#1

FASHION IS INDIA’S MOST-RETURNED CATEGORY

Fast fashion delivery already exists here — M-Now, Slikk, Blip, AJIO Rush, ZILO. Every one of them runs on dark stores, and every one of them is metro-only. Tier 2 and 3 already buy fashion online — on industry estimates, more than half of India’s fashion e-commerce demand. They simply wait days for it.

HOW AN ORDER MOVES

No warehouse. The shop around the corner.

Trendzo owns no stock. The catalog is only as deep as the shelves nearby — that is the model, not a gap in it.

LISTING A PRODUCT

From a phone photo to a live listing.

No photographer. No studio. No shoot day.

Stock stays on the retailer's own shelf. Nothing is consigned.

- 01

A full rack at once
Bulk mode queues mockups for many products in one pass. Marked beta in the current build.
- 02

One toggle takes the store live
Online means accepting orders. Off, and routing skips the store — no order it cannot fill.
- 03

Earnings, payouts, full ops
Amount owed and the next payout sit in the app, also beta. Billing and orders in the web portal.

HOW MOCKUPS GET MADE

Phone snap in. Studio catalog out.

03 · GENERATE

04 · FIVE STUDIO SHOTS

05 · LIVE, PRICED

FROM DISCOVERY TO DOORSTEP

Every step removes a reason to hesitate.

- 01

60 minutes, not three days
From a shop near you, not a warehouse in another city.
- 02

Certain before you pay
Two ways to try first — on your screen, and at your door.
- 03

One cart, every nearby store
Items from several local shops check out as a single order.

REACT NATIVE, RUNNING ON DEVICE AGAINST THE LIVE CATALOG, WITH THE PAYMENT GATEWAY INTEGRATED. FULL STATUS ON THE BUILD SLIDE.

05 · THREE WAYS TO RECEIVE IT

HOW TRY-AND-BUY WORKS

| The sale closes at the door.

TRY-AND-BUY, AT THE DOOR

A waited trial is not a per-drop job

The agent stands at the door for the whole trial. Per-drop pay pushes against waiting; a salary does not.

Returned stock needs a custodian

What comes back is still the store's goods. There is no warehouse to absorb it — the same agent carries it back.

The door moment is the product

Not a delivery step. Salaried agents, assigned by zone, can be trained on it and held to it.

ALL THREE APPS ARE BUILT AND WIRED TO LIVE DISPATCH. NOTHING HAS LAUNCHED YET.

THE SHELVES ALREADY EXIST

The dark-store model builds the shelf, then buys the stock.
India’s fashion shops already are one — stocked, staffed, paid for.

7,000+

DARK STORES IN 2025, UP FROM ~2,200 IN 2023

~65%

OF NEW DARK STORES OPENED IN THE TOP 10 CITIES

59%

OF INDIA’S APPAREL MARKET IS UNORGANISED —
MOSTLY SINGLE-STORE SHOPS

AGAINST EVERYONE ELSE

Most hold three of these. The last two are the ones a warehouse cannot buy.

ADJACENT MODELS, AND WHAT EACH ONE ACTUALLY DOES

		FASHION	ONE HOUR	TRY BEFORE PAY	LOCAL STOCK	BEYOND METROS
Myntra, Ajo	marketplace	Yes	No	No	No	Yes
Blinkit, Zepto, Instamart		No	Yes	No	No	Yes
Amazon, Flipkart Fashion		Yes	No	At home, over days	No	Yes
M-Now, Slikk, Blip, ZILO	metro fast fashion	Yes	Yes	Slikk only	No	No
Trendzo		Yes	Yes	Yes, at the door	Yes	Yes

The row above ours is the closest: metro fast-fashion players already delivering inside an hour, and Slikk already letting the rider wait while you try. But all of them sell stock they bought and hold in their own dark stores, and that is what ties them to metro density. We sell what the shop already owns, so a new city is signed, not built.

POSITIONING PER EACH COMPANY’S PUBLISHED SERVICE TERMS, AUGUST 2026 · “BEYOND METROS” MEANS LIVE SERVICE IN TIER 2 CITIES, NOT STATED EXPANSION PLANS

WHY NOW

The category is early. The expensive lesson has already been paid for by somebody else.

PRODUCT LIFE CYCLE · WHERE THE CATEGORY IS

Quick commerce: ~70% of online grocery, ~1% of fashion.

HYPE CYCLE · WHERE THE MODEL IS

Bain: dark-store economics unproven beyond Metros and Tier 1.

Grocery proved people will pay for speed, then ran out of room. Fashion has the demand and none of the coverage — and the capital-heavy way of serving it has already been tried, in cities we are not starting in.

SIZING THE MARKET

Not all of Indian apparel. The Tier 2 and 3 part, still bought offline.

59%

OF INDIA'S APPAREL MARKET IS UNORGANISED — SINGLE-STORE SHOPS

BUILDER AND OPERATOR

One has already digitised a street market. The other has run the supply chain this sells.

Akshat Jain

FOUNDER & CEO · PRODUCT, ENGINEERING, PLATFORM

Synquic Labs

Software firm, three years. 68 projects shipped — 10+ apps, 5+ SaaS products, inventory systems, AI infrastructure, and Oppo's in-house retailer management platform.

Ferrywala

Digitising street markets and unskilled vendors — the same problem Trendzo solves, one rung further down.

Slide

Meta and Google bucket automation, voice and email automation.

Hardik Jain

FOUNDER & COO · SUPPLY, STORE ONBOARDING, OPERATIONS

Yarn manufacturing mill

Runs a mill in the textile industry — the supply chain that fills every shelf Trendzo lists, known from the raw-material end up.

Corporate DSA

Bank finance and legal. Onboarding a shop is a KYC, banking and contract problem before it is a sales one.

The relationships

Signing 100 Indore stores is done in person, by someone the trade already knows.

Trendzo is a software platform wrapped around an apparel supply chain. One of us has built platforms like it and digitised informal retail before; the other has lived inside the supply chain and can open the doors. That split is the reason this is buildable by two people.

WHAT THIS ROUND BUYS

Rs 2 crore to a Year-1 proof in Indore. Two ways in — certainty of capital, or a tighter price for staging it.

OPTION A · SINGLE TRANCHE

Rs 2 Cr **18%**
UP FRONT, AT CLOSE FOUNDER DILUTION

~Rs 9 crore pre-money, Rs 11 crore post. The investor prices the certainty of full capital committed on day one.

OPTION B · PHASED

50L + 1.5 Cr **15%**
NOW, THEN ON YEAR-1 PROOF FOUNDER DILUTION

~Rs 11.3 crore pre-money, Rs 13.3 crore post. The second tranche releases only on the Year-1 proof, so the round prices three points tighter.

USE OF FUNDS · THE FULL RS 2 CRORE, EITHER STRUCTURE

THE YEAR-1 PROOF IT BUYS

~100 Indore stores onboarded onto live inventory sync, a three-agent fleet running, sub-60-minute delivery proven, and a ~150-orders-a-day exit run-rate with the first repeat-cohort data.

AND WHAT COMES AFTER

A Rs 2–3 crore seed at around month 18 bridges the Rs 2.18 crore trough and funds four cities — en route to EBITDA breakeven in Year 4.
